

## Primary Sense Desktop – Performance Dashboard

Click on the Primary Sense Desktop icon on the bottom toolbar to view the Primary Sense sidebar.

This side bar appears when the icon is clicked

**By right clicking** anywhere on the ribbon - all options are visible and you can select Primary Sense Performance (see right).

The Dashboard opens up into a new window. Data within the dashboard **updates every minute**.

Last response	Not available
Triggered alerts	0
GPs responding to alerts	0

## Primary Sense Desktop – Performance Dashboard

### Details of dashboard indicators:

Is the extractor working?	
Last data extract	The date and time data was last extracted from your clinical software system via the Primary Sense Extractor.
Is the desktop working?	
Last medication checked for an alert	The last date and time a medication was monitored from your clinical software system via the Primary Sense Desktop. <i>Note – medication monitoring will only occur if the Primary Sense Desktop is installed on a workstation being used for prescribing (e.g. GP computer)</i>
Last report viewed	The last date and time a report was opened from Primary Sense Desktop.
Your practices statistics	
Total patients marked as active	Total number of patients in your clinical software system not inactivated or deceased.
RACGP active patients	Number of patients who have attended the practice three times or more in the past 2 years and have not been inactivated or deceased.
Total ACG patients	Number of patients analysed through ACG (patients with one or more visits in the past 12 months)
ACG band 1 patients	Number of patients classified as band 1 – low complexity. Patients are generally healthy and only present because of acute, time-limited conditions or minor issues.
ACG band 2 patients	Number of patients classified as band 2 – low to moderate complexity. Patients typically have one risk factor.
ACG band 3 patients	Number of patients classified as band 3 – moderate complexity. Patients typically have at least 1 chronic condition and are at risk of progressive deterioration.
ACG band 4 patients	Number of patients classified as band 4 – moderate to high complexity. Patients are characterized by multimorbidity.
ACG band 5 patients	Number of patients classified as band 5 – high complexity. Patients are characterized by instability, multimorbidity, polypharmacy or patients requiring end of life care.
Who is viewing reports	
Nurses/managers viewing reports	Number of reports viewed by nurses/managers since installation of Primary Sense Desktop
GPs viewing reports	Number of GPs viewing reports since installation of Primary Sense Desktop
Who is getting medication safety alerts	
Medications checked for an alert	Number of medications monitored from clinical software system for an alert via the Primary Sense Desktop. <i>Note – medication monitoring will only occur if the Primary Sense Desktop is installed on a workstation being used for prescribing (e.g. GP computer)</i>
GPs who may get an alert	Number of GPs who are currently or have previously prescribed medications in the clinical software system on a workstation that also has Primary Sense Desktop installed

## Primary Sense Desktop – Performance Dashboard

Last monitored request	The last date and time a medication was monitored from your clinical software system via the Primary Sense Desktop. <i>Note – medication monitoring will only occur if the Primary Sense Desktop is installed on a workstation being used for prescribing (e.g. GP computer)</i>
Last response	Last date and time a GP responded to a medication alert from Primary Sense Desktop.
Triggered alerts	Total number of triggered medication alerts since installation of Primary Sense Desktop
GPs responding to alerts	Number of GPs who have responded to a medication alert from Primary Sense Desktop.
