

Using GP Prompts in Primary Sense Desktop:

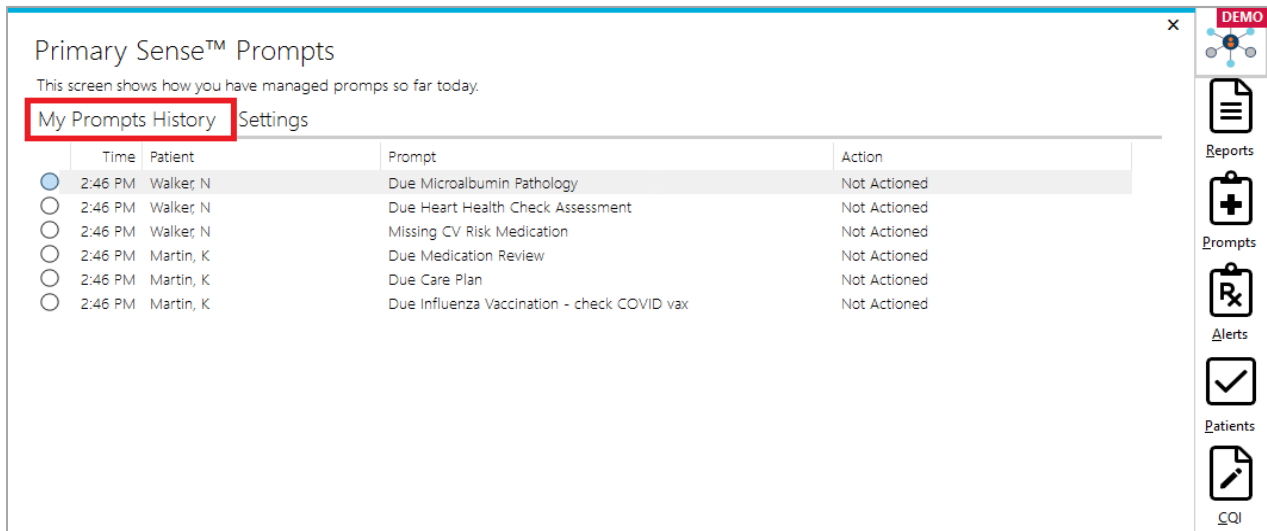

Primary Sense GP Prompts focus on the most at risk patients, and provide on screen prompts to highlight potential gaps in care including use of the Johns Hopkins complexity and hospital risk scores.

Prompts will only generate when the patient file in the clinical software has been opened by a General Practitioner (logged in), and only in specific circumstances (where specific criteria are met i.e. complexity scores and gaps in care).

Click on the Primary Sense icon on the bottom toolbar to view the Primary Sense Desktop.

On the sidebar, click on the 'prompts' icon. The prompts history that has been generated are presented. Double clicking a prompt in history will generate the prompt again for review with the original data.

Primary Sense™ Prompts

This screen shows how you have managed prompts so far today.

My Prompts History Settings

	Time	Patient	Prompt	Action
<input checked="" type="radio"/>	2:46 PM	Walker, N	Due Microalbumin Pathology	Not Actioned
<input type="radio"/>	2:46 PM	Walker, N	Due Heart Health Check Assessment	Not Actioned
<input type="radio"/>	2:46 PM	Walker, N	Missing CV Risk Medication	Not Actioned
<input type="radio"/>	2:46 PM	Martin, K	Due Medication Review	Not Actioned
<input type="radio"/>	2:46 PM	Martin, K	Due Care Plan	Not Actioned
<input type="radio"/>	2:46 PM	Martin, K	Due Influenza Vaccination - check COVID vax	Not Actioned

My Prompts History **Settings**

Double-click a prompt to opt in or out.

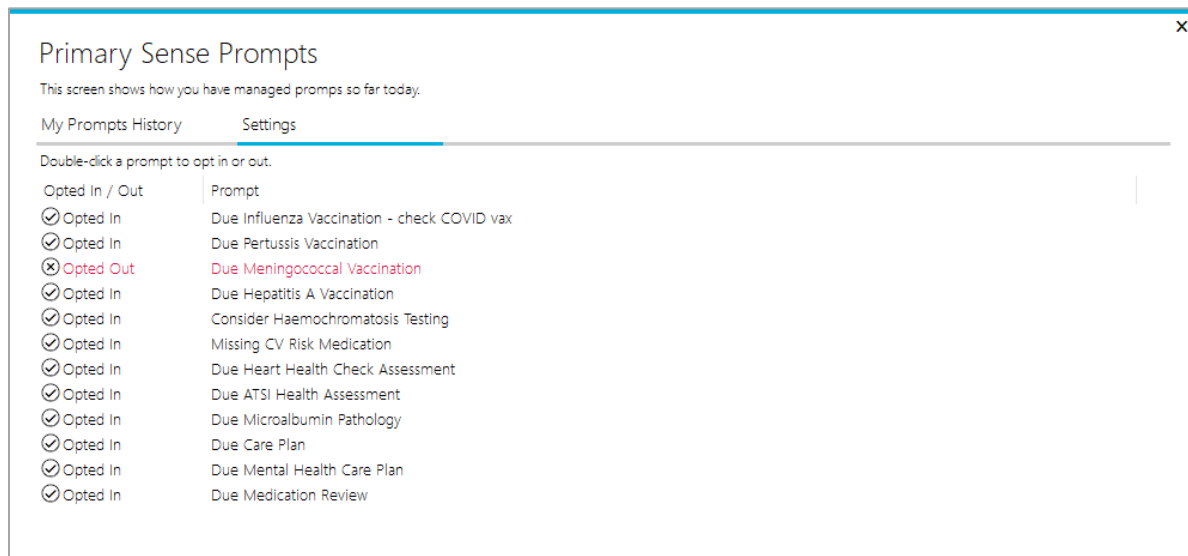

Opted In / Out	Prompt
<input checked="" type="checkbox"/>	Due Influenza Vaccination - check COVID vax
<input checked="" type="checkbox"/>	Due Pertussis Vaccination
<input checked="" type="checkbox"/>	Due Meningococcal Vaccination
<input checked="" type="checkbox"/>	Due Hepatitis A Vaccination
<input checked="" type="checkbox"/>	Consider Haemochromatosis Testing
<input checked="" type="checkbox"/>	Missing CV Risk Medication
<input checked="" type="checkbox"/>	Due Heart Health Check Assessment
<input checked="" type="checkbox"/>	Due ATSI Health Assessment
<input checked="" type="checkbox"/>	Due Microalbumin Pathology
<input checked="" type="checkbox"/>	Due Care Plan
<input checked="" type="checkbox"/>	Due Mental Health Care Plan
<input checked="" type="checkbox"/>	Due Medication Review

Using GP Prompts in Primary Sense Desktop:

To switch a prompt off, double click on the title to receive this confirmation

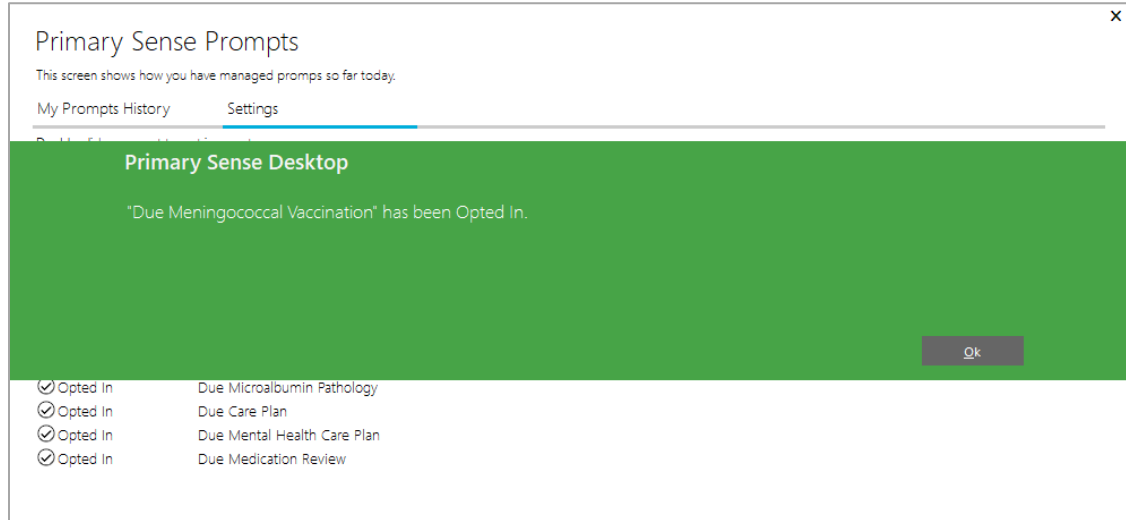

The selected prompt turned off, will now be displayed in **RED**

Note: this is specific for the user logged in.

Using GP Prompts in Primary Sense Desktop:

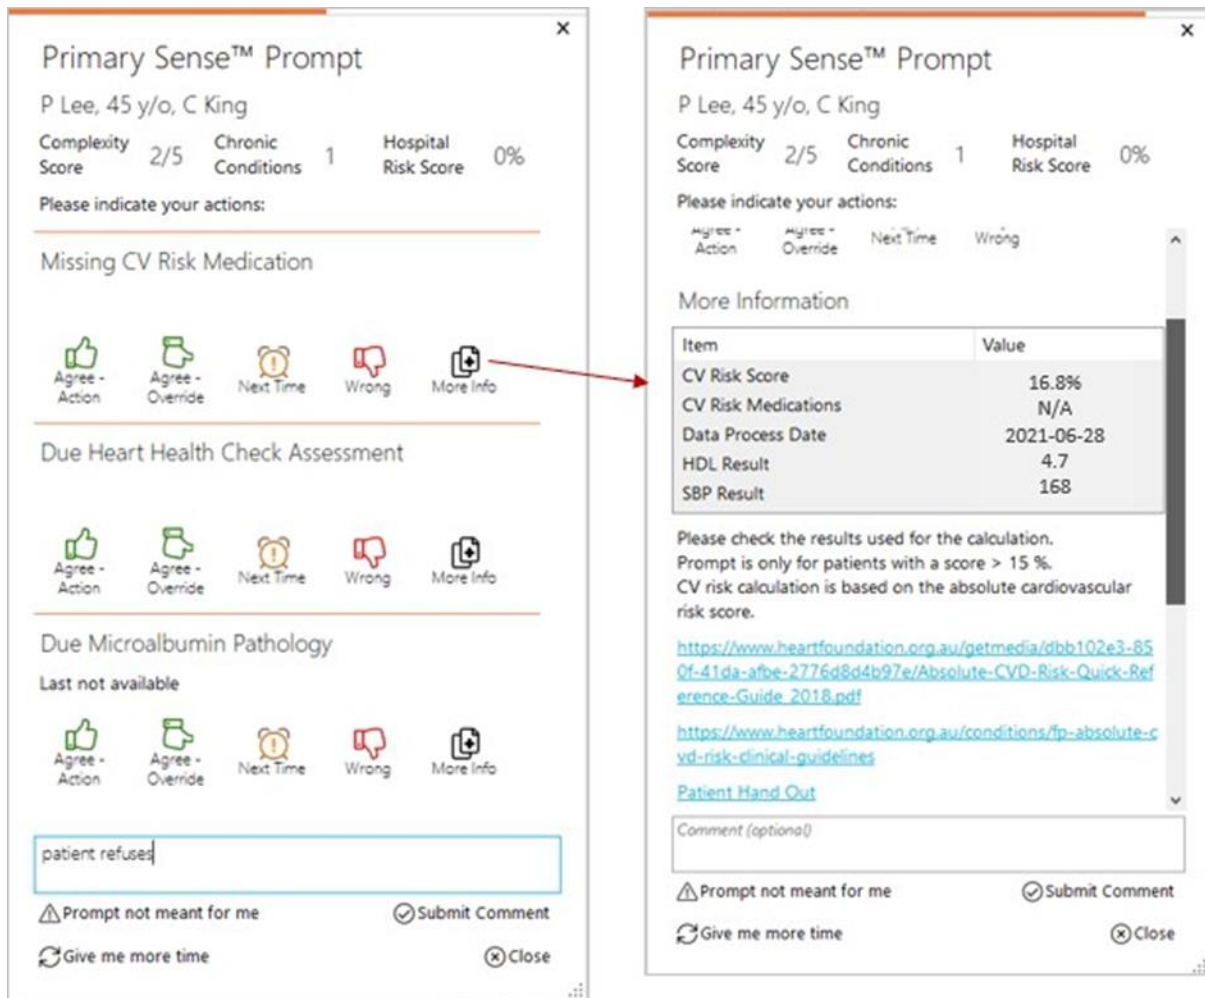

To re-enable a prompt, double click on the title to receive this confirmation

Using GP Prompts in Primary Sense Desktop:

Each prompt will only contain 3 items at a time, ordered in terms of clinical priority. The more information section provides the rationale for the prompt, and relevant details for cross reference by the general practitioner. Graphs contain the patient's actual clinical results where available.

Example of a prompt. NB: below prompts contain demo data

Primary Sense™ Prompt
P Lee, 45 y/o, C King
Complexity Score 2/5 Chronic Conditions 1 Hospital Risk Score 0%

Comment (optional)

⚠ Prompt not meant for me ✓ Submit Comment
🔄 Give me more time ✕ Close

Users can exit the prompt by selecting one of the 'actions' available, or by selecting 'prompt not meant for me', submit comment or close. **Selecting an action other than 'remind me next time' will disable the prompt for the patient for 12 months.**

Prompts will stay visible for only 3 minutes to prevent multiple prompts being open on the GP's screen at one time. Clicking 'give me more time' will re-set the 3 minutes, otherwise prompts can be retrieved from the "My Prompts History" for further review at the end of the shift, or to change the selected options.
